OBJECTIVE:

The Indian Power Sector is facing major challenges with the introduction of reforms, globalization and liberalization policies of the government. With increase in system expansion, stability and security problems have become challenging. It is of vital importance to focus the attention now, on ways and means to build expertise within the country, to find solutions for the problems existing in the system and also for the problems that may arise in the future. Research is urgently needed to bridge the knowledge and technology gaps, more so due to changes in technology today at a more profound and faster pace in the new millennium, in various subsections of power sector (Generation, Transmission & Distribution). The R&D needs to aim at either improving design of an individual plant component and/or evolving cost efficient overall process, take advantage of the advances in IT, electronics and communication to improve the control & instrumentation system, data acquisition system and monitoring of system performance parameters.

WORKSHOP COVERS:

Research that can be taken up in:

- Generation
- Transmission
- Protection & Control
- Distribution & Power Quality.

RESOURCE PERSONS:

1. **Dr. M Selvaraj**
EO, MED, CPRI, Bangalore
2. **Dr. K S Meera**
JD, PSD, CPRI, Bangalore
3. **Sri. B. Raju,**
